

Federal Cash and Financial Management

The District's financial management system and records will be sufficient for preparing required reports and for tracing expenditures to a level that establishes funds have been used according to federal statutes, regulations and the terms and conditions of the federal award. This is in addition to maintaining a system of funds and accounts in accordance with state law and the accounting manual (Policy 6020).

The District's financial management system will:

- Identify all federal awards received and expended, including specific information pertaining to the award: federal program name; CFDA title and number; identification number and year; and name of federal and any pass-through agency.
- Provide for accurate, current and complete disclosure of the results of each federal award in accordance with reporting requirements.
- Include records and supporting documentation that identify the source and application of funds for federally-funded activities, including authorizations, obligations, unobligated balances, expenditures, assets, income and interest.
- Enable the District to maintain effective internal controls to ensure accountability and proper safeguarding and use of all funds, property and other assets (for example, adequate segregation of duties).
- Provide a comparison of expenditures with budget amounts for each federal award.

In order for the District to comply with federal regulations for grant recipients, the Superintendent will implement written procedures for: 1) cash management; and 2) determining the allowability of costs in accordance with Cost Principles and the federal award terms and conditions.
